ASIAN DEMOGRAPHIC RESEARCH INSTITUTE
上海大学亚洲人口研究中心暨人口研究所

ADRI - New Headquarter of Asian MetaCentre

- Build a Community for Scientific Research of Asian Population and Sustainable Development
- Serve as the platform for research, training, and communication among Asian population research institutes
- Work closely with IIASA, ARI, and CPS
- Collaborate with APA, population research institutes of Asia and beyond,
 - IIASA member states in the region

ADRI - New Headquarter of Asian MetaCentre

- Asian Population Forum (networking, defining important areas to collaborate)
 - Every 2-3 years
- Research workshops, for topics of common interests
 - 2-3 a year
 - Joint proposal for funding
 - Publications (special issues)
- Asian Population Research Data Alliance
- Training Workshops
 - Working with CPS
 - IIASA/ADRI Summer Workshop

News and Updates

Launch of Asian Demographic Research Institute (ADRI) and a new home for Asian MetaCentre

The Asian Demographic Research Institute (ADRI), a population research institute based at Shanghai University, was launched in July 2015. The core of the scientific foundation of the institute will be formal demography. Building on the methods of multi-dimensional demography, ADRI will study population dynamics by age, gender, education, rural/urban residence, household status, and health condition. These formal models cater for a wide range of policy relevant topics in population research and population-economy-environment interactions.

The new institute will also create a platform for regional collaboration in demographic research and training, through fostering research projects of common interest, holding annual Asian Population Fora, organizing demographic training workshops around the region, and hosting international visiting scholars. It has also reached a collaborative agreement with the principal investigators of the Asian MetaCentre for Population and Sustainable Development Analysis and will function as the new headquarter of the MetaCentre from 2016.

New Event
Shanghai Population Forum on Future Directions in Asian Population Research
Date : 10 - 12 October 2016
Venue: Asian Population Research Institute (ADRI), Shanghai University, Shanghai, China

Organised by Asian Population Research Institute (ADRI). More details available [here](#).

Training Workshop on "Demographic Analysis with Applications to Aging Societies"
Date : 7-18 November 2016
Venue : College of Population Studies, Chulalongkorn University, Bangkok, Thailand

Jointly organised by College of Population Studies, Chulalongkorn University in collaboration with International Institute for Applied Systems Analysis and Asia Research Institute, NUS.
More details are available [here](#).

New Publications
Asian Demographic and Human Capital Datasheet 2012
More details are available [here](#).

CHAMPSEA Publications
New publications and findings from the CHAMPSEA study are now available. More details are available [here](#).
